**Subject:** [WARNING: SPF validation failed] RE: PVL Administrative Order on Consent Docket Number CWA-02-2018-3104

Good afternoon. We are still reviewing the subject AO. One of our team members had to go to Philadelphia to tend to some family matters. We would like to ask for an additional three days to submit our comments back to EPA.

Regarding the early comments already submitted we want to stress that the matter of the Tallaboa River watershed and potential connection to the storm water discharge from PVL is critical for us in terms of the people that oppose the acceptance of coal ash in Peñuelas. Some people are claiming that our operation may affect the ground water down in the valley. There is no connection between the PVL site and the Tallaboa River (surface or ground water).

**Subject:** PVL Administrative Order on Consent Docket Number CWA-02-2018-3104

Dear Mr. Rodriguez

As per our conversations regarding compliance of the 2015 MSGP and Administrative Compliance Order Docket Number CWA-02-2017-3103. EPA have drafted an Administrative Order on Consent Docket Number CWA-02-2018-3104 for your review and consent.

We have included two formats: one in PDF, which you could sign and date upon receipt and send back to us for finalizing it and issuance; and, one in Word, in case you wish to suggest changes (in track changes) for our consideration, subject to our management review and approval.

We are granting until August 10, 2018 for your response and approval. If you would like to confer with us please contact me to set up a meeting to discuss your concerns and be able to reach an Agreement. Please note that the goal is to issue the final Consent Order by September 28, 2018.

"If you are part of this Planet, you have a duty to protect it"
